DETAILED ACTION

Allowable Subject Matter

Claims 1-5 and 12 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's **claim 1** is drawn toward a non-transitory computer-readable recording medium on which are recorded an index table, at least one application and an operation mode object, wherein the index table shows correspondence between the operation mode object and each title, the operation mode object is either (i) a movie mode object for a movie mode or (ii) a virtual machine mode object for a virtual machine mode, the movie mode object includes a navigation command showing a control procedure, the virtual machine mode object includes an application management table, each application is described in Java programming language, and stored in an archive file so that the application is readable into a heap area of a virtual machine, and the application management table shows one or more applications that has a life cycle bound to the title corresponding to the virtual machine mode object and a run attribute for each of the one or more applications for determining a run condition after a title switch.

Applicant's independent **claim 1** comprises a particular combination that is neither taught nor suggested by the prior art. The closest prior art of record, Tsumagari et al (US PgPub 2003/0161615), differs from the claimed invention by failing to teach or fairly suggest the application management table shows one or more applications that

Art Unit: 2621

has a life cycle bound to the title corresponding to the virtual machine mode object and a run attribute for each of the one or more applications for determining a run condition after a title switch.

Applicant's independent **claims 3 and 12** are the corresponding playback apparatus and playback method, respectively, of the medium of claim 1; as they contain the identical limitation described above in regard to claim 1, they are found allowable for similar reasoning. Further, the examiner notes that on page 31, lines 3-9, the specification clearly states that the programs run by the apparatus are embodied in hardware (e.g. CPU (22) and instruction ROM (24)) and are therefore drawn to statutory subject matter (i.e., the modules are not pure software embodiments).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MARC DAZENSKI whose telephone number is (571)270-5577. The examiner can normally be reached on M-F, 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on (571)272-7905. The fax phone
